### Google Cloud Integration

#### API Authorization

Status: CONNECTED

Select API Key

ⓘ ChatLib uses the Google Gemini API via a private project. Your institutional data remains isolated and is never used to train global models.

### Engine Configuration

#### MODEL SELECTION

##### Gemini 3 Flash

Speed-optimized for common queries and high concurrency.

##### Gemini 3 Pro

Deep reasoning for complex research and cross-referencing.

#### REASONING DEPTH (THINKING TOKENS)

0

FAST OUTPUT

DEEP REASONING

#### Google Search Grounding

Allow the model to query the web for real-time news or events outside library data.

#### SYSTEM INSTRUCTIONS

You are a virtual library assistant.

Your role is to help library patrons by answering questions using only the provided library data.

Be clear, polite, and accurate.

If the information is not available in the sources, say so and suggest contacting the library staff.

#### Responsible AI Alignment

Ensure your assistant adheres to library safety standards. Review content filters and data residency in the Security tab.

Go to Security Settings

**GENERAL ACCESS**   **GOOGLE SITES SETUP**   **SEO & ANALYTICS**

**Integrating with Google Sites**  
Google Sites is common in libraries. To add ChatLib, follow these steps:  
1. Open your [Google Site](#) in edit mode.  
2. In the right sidebar, click **Embed**.  
3. Select the **By URL** tab.  
4. Paste the [Direct Share Link](#) provided below.  
5. Click **Insert** and resize the element to fill the page width.
